

WEATHER SCIENCE WEDNESDAY

Sponge & Glass HUMIDITY DEMO

YOU'LL NEED:

sponge

glass of
water

TRY THIS:

- ☐ Place the sponge above the glass.
- ☐ Dip the sponge into the water, then lift it.
- ☐ Can the sponge hold any more water?

**Kelsey
McEwen
Meteorologist**

WHAT'S HAPPENING?

When the sponge is full and dripping, that's like the air on a very humid day! It can't soak up any more water, so it feels wet and sticky.

DRAW WHAT YOU SAW!

A simple rectangular box with rounded corners, intended for a drawing.
